Section 36. (1) No licence to operate an elevator shall be issued unless the applicant for the licence establishes to the satisfaction of the Commission that

- (a) the premises the applicant proposes to use are appropriate for the storage and handling of grain;
- (b) the elevator is or will be of such type and in such condition and the equipment of the elevator is or will be of such type and size and in such condition as to enable the applicant to provide at the location where he proposes to operate the elevator the services required by or pursuant to this Act to be provided at that location by a licensee holding a licence of the class for which the applicant has applied; and
- (c) he is financially able to carry on the proposed elevator operation and has given security by bond, insurance or otherwise sufficient to ensure that all obligations to holders of documents for the payment of money or delivery of grain issued by the applicant pursuant to this Act will be met.

(3) The Commission may refuse to issue a licence where the applicant has been convicted of an offence under this Act within the twelve months immediately preceding his application and the Commission is satisfied that it would not be in the public interest to issue a licence to him.

(4) The Commission shall, before refusing to issue a licence, afford the applicant for the licence or his representative a full and ample opportunity to be heard in relation to the application.

(5) Any refusal to issue a licence shall be by order of the Commission.

Such elevators' and dealers' licences are issued by the Canadian Grain Commission through the Economics and Statistics Division. The office also supervises the implementation of Section 36 (c) under which all such licences must be secured by bond or otherwise for the performance of all obligations imposed upon them by the Act.

Requirements as to facilities and equipment and rules and regulations governing the conduct of licensees and the operations of licensed facilities are carried in various sections of the Canada Grain Act, the Canada Grain Regulations and in orders and directives of the Commission as may be issued from time to time.

- (3) La Commission peut refuser de délivrer un permis lorsque le requérant a été déclaré coupable d'une infraction prévue par la présente loi dans les douze mois qui précèdent immédiatement sa demande et que la Commission est convaincue qu'il ne serait pas d'intérêt public de lui délivrer un permis.
- (4) La Commission doit, avant de refuser de délivrer un permis, donner au requérant du permis ou à son représentant la plus large possibilité d'être entendu au sujet de la demande.
- (5) Tout refus de délivrance d'un permis doit être fait par arrêté de la Commission.

Les conditions concernant les installations et le matériel ainsi que les règles régissant la conduite des titulaires de permis et l'exploitation d'installations autorisées font l'objet de plusieurs articles de la Loi sur les grains du Canada, du Règlement sur les grains du Canada ainsi que des ordres et des directives que la Commission émet de temps à autre.

NOTE: In most instances where a grain company operates two or more primary elevators at one location, the operations have been combined under a single manager. This has been aided by the trading of elevators between companies. As a result of a move towards greater economy and efficiency, the 3,528 elevators individually licensed as at August 1, 1979 reflect only 2,376 'operating units'. The above table indicates this pattern, according to the major companies. The bracketed figures indicate the licensed separate units. It should be recognized that this statement reflects a constantly changing situation and is based upon the latest available data.

NOTA: Dans la plupart des cas, lorsqu'une compagnie de grain exploite deux silos primaires ou plus au même endroit, les exploitations ont été combinées et relèvent d'un seul directeur. L'échange de silos entre compagnies a favorisé cette politique. En vue d'accroître les avantages économiques et l'efficacité des opérations, les 3,528 silos agréés séparément au 1^{er} août 1979 représentent seulement 2,376 'unités d'exploitation'. Le tableau ci-dessus indique ce mode de développement pour les compagnies les plus considérables. Les chiffres entre parenthèses indiquent les unités distinctes agréées. Il faut se rappeler que c'est une situation qui évolue sans cesse et qui est fondée sur les plus récentes données disponibles.
